 - 7.5 KPIs to Track

1. Executive Summary

This Full SEO Audit & Strategy Report is a May 31, 2026 fresh re-baseline of HavenInLipa.com, run end-to-end (Phases 1-3) with both approval gates passed. Its defining decision is STRATEGIC CONTINUITY: at the client's direction, this run does NOT invent a new strategy. It keeps the existing 6-cluster keyword tracker as the single source of truth and limits new work to keyword gaps that were already earmarked in that tracker.

Headline findings:

- **Properties:** Both money listings are live again. The 1BR (sleeps 5, solar, P2,000) and 2BR (sleeps 9, P2,800) were reactivated on May 31; placeholder demo listings seen earlier in the crawl were confirmed by the client as non-final.
- **Content:** Property pages are content-rich and on-brand, well above the local-competitor norm.
- **Technical:** No JSON-LD schema anywhere; property pages are missing from sitemap.xml; FAQ answers lack internal links. These are the highest-ROI fixes and need no new content.
- **Moat:** No local accommodation competitor (Lakeview Resort, JET Hotel, etc.) runs a content engine. HIL is the only Lipa lodging brand ranking on planning intent - a durable moat.
- **Reconciliation:** The keyword tracker's target URLs are stale (old planned slugs vs. live SEO slugs), producing false 'Not Indexed' rows. A tracker URL-sync is queued.

Phase 3 produced three publish-ready drafts mapped to existing tracker gaps: a barkada / 9-pax house guide (Article #27), a Batangas road-trip hub that bases the trip in Lipa (#28), and an evergreen 'Summer in Lipa' cool-highland piece (#29). Two lower-priority gaps (senior-friendly, solo travel) were outlined and queued for Q3.

2. Website Audit (May 31 State)

2.1 Live Site Structure & Properties

Main site nav: Home, Properties, About, Location, Blog, FAQ, Contact, Book Now. Two live listings (reactivated 2026-05-31):

Property	Config	Sleeps	Price/night	URL
Cozy 1BR Haven (Solar, Netflix, Wi-Fi)	1BR	5	P2,000	/properties/cozy-1-bedroom
Spacious 2BR Getaway (Wi-Fi, Parking)	2BR	9	P2,800	/properties/spacious-2-bedroom

'Mickey in Lipa' is NOT yet a live listing - it exists only as the /mickey-in-lipa-coming-soon/ blog teaser. Per client direction it remains parked until the listing and real photos exist. Blog is healthy: 11 live posts (sitemap lastmod 2026-05-26), consistent with the project record.

2.2 Content Quality

- Property pages are deep (~2,800-3,000 words est.) with descriptions, amenities, neighborhood radius guide, verified reviews, house rules, transparent PHP pricing, per-page FAQ, and internal blog links.
- Voice is on-brand: anti-hype, specific (e.g. '400 Mbps tested', 'solar backup'), parent-to-parent / host-to-traveler.
- Blog content engine is on a sustained weekly cadence.

2.3 Technical SEO Findings

Finding	Severity	Fix
---------	----------	-----

No JSON-LD schema on property pages (LodgingBusiness/Product, Review, Offer) or FAQ	High	Add structured data; no content change needed
Property pages absent from sitemap.xml (only Home/FAQ/About/Privacy/Terms listed)	High	Add /properties/* and resubmit in GSC
FAQ answers contain no internal links to property/blog pages	Medium	Add contextual internal links
No embedded map on property pages (address as text only)	Low-Med	Embed Google Map
/tag/ and /author/ archives still indexable (thin)	Low	noindex, follow

2.4 Crawl Reliability Note

Early homepage fetches returned placeholder demo listings ('The Lipa Retreat', 'Casa Verde', 'The Urban Suite'). The client confirmed these were placeholders and reactivated the two real listings during the session; a cache-busted re-fetch then returned the correct state. Granular extraction figures (exact photo/review/word counts) are treated as approximate.

3. Competitor Analysis

Competitor basis (client-selected): local short-term-rental hosts / resorts. On investigation the landscape splits into two tiers.

3.1 Local Accommodation Competitors (with websites)

Competitor	Type	Own blog / guides?	Direct booking?	Depth
Lakeview Resort	Villa resort, infinity pools	None	Contact form	Thin-Mod
JET Hotel	3-star city hotel	None	Strong	Thin-Mod
The Farm at San Benito	Luxury wellness resort	Limited (PR)	Own engine	Brand-led
Cintai Corito's Garden	Balinese resort hotel	Minimal	Own engine	Thin

Key insight: NOT ONE local accommodation competitor runs a content/SEO engine targeting 'things to do in Lipa', area guides, or trip planning. This is HavenInLipa's structural moat - it is the only Lipa lodging brand that ranks (and can keep ranking) on informational and planning intent.

3.2 Who Owns the Informational SERPs

- Pure STR hosts (Joenice, Gillera, PMPJ, etc.) exist only as OTA listings - no website, no content.
- Informational SERPs are dominated by OTAs/aggregators (Tripadvisor, Expedia, Trip.com, Traveloka, Vrbo, Yelp) and PH travel blogs (Tara Lets Anywhere, Pinoy Adventurista, Trip101). Generic, non-local, no booking stake in Lipa.

3.3 Positioning Opportunities

- 'Where to stay in Lipa' decision content - OTAs only list, nobody helps travelers choose.
- Group/barkada and long-stay intent - resorts chase events/golf; nobody owns these from a host's POV. Maps directly to the live 2BR (groups) and 1BR (long-stay/solar).

4. Content Strategy (Continuity-First)

4.1 The Existing 6-Cluster Framework

Per client direction, the strategy keeps the six clusters already defined in HavenInLipa_Keyword_Tracker.xlsx. No new cluster framework was created.

#	Cluster	Dominant Intent
1	Short-Term Rentals	Transactional
2	Things to Do in Lipa	Informational
3	Weekend Getaway / Audience	Mixed / Commercial / Seasonal
4	Travel Planning & Logistics	Informational
5	Direct Booking & Value	Commercial
6	Branded / Property (parked - Mickey)	Branded

4.2 Tracker Reconciliation Findings

- **Finding 1:** Stale target URLs: the tracker's Page Indexing Tracker checks old planned slugs (e.g. /things-to-do-lipa-city/) that 404; live slugs are longer/SEO-optimized (e.g. /15-best-things-to-do-in-lipa-city-batangas-2026-locals-guide/). Several 'Not Indexed' rows are false alarms. Sync queued.
- **Finding 2:** The tracker predates the June-August calendar (last reviewed 2026-05-18) - it has no rows for articles #15-26. Add them during the URL-sync.

4.3 Target Keyword / Topic Set (Approved)

Approved scope (STOP POINT #1): existing tracker GAP keywords only. Net-new keywords were declined in favor of strict continuity.

Keyword	Cluster	Priority	Tracker Status
barkada group trip lipa	3	Medium	Gap -> Article #27 (drafted)
batangas road trip itinerary	4	Medium	Gap -> Article #28 (drafted)
summer in lipa (evergreen)	3	Medium	Gap -> Article #29 (drafted)
senior-friendly lipa getaway	3	Low	Gap - outlined, Q3 backlog
solo travel guide to lipa	3	Low	Gap - outlined, Q3 backlog

4.4 Priority Content Plan

Priority	Item	Tie	Effort	Impact
P0	Property + FAQ schema (JSON-LD)	gates Cluster 1	Low	High
P0	Add /properties/* to sitemap + resubmit GSC	gates Cluster 1	Low	High
P0	Sync tracker URLs + add #15-26 rows	tracker upkeep	Low	High
P1	Barkada / 9-pax guide (#27)	C3 existing gap	Med	High
P2	Batangas road-trip hub (#28)	C4 existing gap	Med	Med
P3	Summer in Lipa evergreen (#29)	C3 existing gap	Low	Med
Backlog	Senior-friendly / solo travel	C3 Tier-D gaps	Med	Low

5. SERP & Outline Strategy (Phase 2)

5.1 SERP Patterns by Gap Keyword

Keyword	SERP reality	The wedge (gap exploited)
barkada group trip lipa	Beach-skewed listicles (Anilao/Laiya)	Cost-per-head math (P2,800/9 ~ P311); cool inland alt; drives 2BR
batangas road trip itinerary	Lipa treated as a pass-through	'Use Lipa as your base' hub; ties #1/#4/#5/#7/#10
summer in lipa	Resort lists; ignore elevation	22-34C highland = anti-heat/anti-crowd; solar 1BR angle
senior-friendly lipa getaway	No Lipa-specific senior content	Flat heritage walks, mild climate, hospitals, calm
solo travel guide to lipa	Thin/scattered (TikTok, small blogs)	Safe, walkable, coffee-culture; crosslinks Work From Lipa

5.2 Superior Outlines (Summary)

Five superior outlines were built (full H1-H3 detail in 053126/Phase2_SERP_and_Outlines.md). Each meets the internal-linking floor: >=2 blog links, >=1 property page, the Book Direct article (#6), and the standardized footer - using verified live slugs.

- Two carry-forward flags: (1) 'summer in lipa' built evergreen (no year) since the 2026 summer window has closed - dated promo push deferred to Feb-Mar 2027; (2) the senior piece will not claim the 1BR is senior/PWD-friendly until its layout is fact-checked.

6. Content Production (Phase 3)

6.1 Deliverables Summary

#	Title	Cluster	Status
27	Barkada Getaway in Lipa - Whole House vs Beach Resort	3	Drafted (publish-ready)
28	Batangas Road Trip Itinerary - Lipa as Base	4	Drafted (publish-ready)
29	Summer in Lipa - Cool Highland Escape (evergreen)	3	Drafted (publish-ready)
-	Senior-Friendly Lipa Getaway	3	Outline only (Q3)
-	Solo Travel Guide to Lipa	3	Outline only (Q3)

All three drafts follow the single-file convention (blogger guide embedded under the 'STOP - DO NOT COPY' separator) and the featured-image filename convention. Files live in content for HavenInLipa/053126/.

6.2 Approach & Differentiation

- Barkada (#27): leads with honest cost-per-head math (~P311/head) - the number every competitor listicle omits. Drives the 2BR sleeps-9.
- Road trip (#28): repositions Lipa from pass-through to base; the densest internal-link hub, wiring the existing travel articles together.
- Summer (#29): leans the solar / brownout-proof 1BR differentiator - a real PH-summer advantage no competitor frames.
- All retain the locked brand voice: PHP budgets, named local businesses, anti-hype, direct-booking conversion lever.

7. Recommendations & Next Steps

7.1 Tier A - Technical & Hygiene (Now)

- Add LodgingBusiness/Product + Review + Offer JSON-LD to both property pages; FAQPage schema on /faq.
- Add /properties/* to sitemap.xml and resubmit in GSC.
- Sync the keyword tracker's target URLs to live slugs; add rows for #15-26.
- Add internal links inside FAQ answers; embed maps on property pages.

7.2 Tier B - Drain Tracker Gaps

- Publish #27 (barkada), #28 (road-trip hub), #29 (summer evergreen) - all drafted.
- Wire the hub: add in-body links back to #28 from #1/#4/#5/#7/#10.

7.3 Tier C - Sustain Weekly Cadence

- Resume the locked weekly-Monday cadence with the already-drafted #15-26; slot the new gap articles after the run or interleave where a slot opens.
- Run the R1 'Things to Do' quarterly refresh as pre-scheduled (Aug 31).

7.4 Tier D - Authority Backlog (Q3)

- Draft the senior-friendly and solo-travel pieces (outlined). Fact-check 1BR accessibility before publishing the senior article.

7.5 KPIs to Track

KPI	Source	Cadence
Impressions / clicks per tracked keyword	GSC Performance	Weekly (Mon)
Avg. position movement on HIGH-priority terms	GSC	Weekly
Indexing status (live slugs, not stale)	GSC URL Inspection	Per publish
Rich-result eligibility after schema ship	GSC Enhancements	Monthly
Direct-booking inquiries vs. OTA	Client / contact form	Monthly
